INDOOR PLANTS CAN BE USED TO DRAMATIC EFFECT EVEN IN THE SMALLEST OFFICE

You have heard of the benefits of using indoor plants, but what if you don't have much space? Initial Tropical Plants offer indoor plant display solutions for the space challenged...

Small footprint – big design

One of our most popular office plant displays uses single containers with bold sculptural plants. These complement the sleek lines of modern interior furnishings. Clients can also choose to custom colour containers and plant displays in corporate colours for maximum effect.

Cabinet-top plants

Every office has filing cabinets and cupboards, the tops of which are ideal places for plants. They will help soften the edges of the cabinets and can make the space seem bigger. This is achieved by leading the eye away from the hard top edge of the cabinet and taking it to view the space beyond. In a large office with several ranks of cabinets, the effects can be quite dramatic.

Wall mounted plant displays

Wall mounted plant displays provide an easy, colourful solution to corridors, hallways, reception areas and anywhere you want to add drama to a small space.

Desktop displays

There is some evidence that office staff may take greater pride in their workspace if they are given a greater say in the choice of furnishings – including a choice of desktop plants. Initial Tropical Plants offer a variety of styles, shapes and colours to choose from to help workers personalise their space.

Plant screens and room dividers

The space in open plan offices is frequently divided by screens, either to provide a limited amount of privacy or to segregate different functions within the space. We have a range of stylish troughs to create a green screen, create privacy and help reduce noise in the workplace. For a screen divider with a difference you can't go past a fresh green-zone with plants grouped together for mass effect.

Initial Tropical Plants are continually adding new products to our range of indoor containers and plants. If you would like to hear what's new in the world of indoor plant design or would like more ideas for your workplace, please contact your local Initial Tropical Plants branch and ask to speak with our Design Consultants.

YOU MAY NOT HAVE GIVEN MUCH THOUGHT TO WHAT GOES ON TOP OF YOUR INDOOR PLANT BUT WE HAVE...

Words like “cutting edge, environmentally beneficial, long lasting, innovative and stylish” are not normally connected to recycled used tyres, but that is about to change.

Initial Tropical Plants introduces a new product to our range of planter toppings. Perma-mulch is a new product using old tyres that have been recycled, treated and turned into a clean, dustless, non-toxic and stylish product to top indoor plants. It is manufactured in a range of warm, earthy colours to complement most office interiors.

If recycled rubber/bark is not your thing, we offer a big choice of planter dressings including a wide variety of stones to suit most interior designs.

CHRISTMAS TREES DELIVERED TO YOUR OFFICE

Christmas has a way of creeping up on all of us. Make sure you don't miss out on Initial Tropical Plants special Christmas tree offer this year.

Initial Tropical Plants knows that nothing beats the fresh and fragrant appeal of a “real” tree. We source the best, fresh Christmas trees and deliver to your premises. We will put up the tree, maintain it and take it away when the festive season wraps up.

Initial Tropical Plants also offer special Christmas desktop and reception displays, such as our striking red Bromeliads and the ever popular red Poinsettia which add special Christmas magic.

Make sure you don't miss out this year – contact your Initial Tropical Plants branch and ask for a Christmas tree order form or ask your service Technician for more information.

Note: Christmas tree service is subject to availability and is only available from participating branches. Price does not include decoration of your Christmas tree
